Contents of volume 51

Volume 51, Nr. 1, MAY 2003

Papers

1 *S.K. Hong and Y. Nam*
Stable fuzzy control system design with pole-placement constraint: an LMI approach

13 *C.E. Bozdağ, C. Kahraman and D. Ruan*
Fuzzy group decision making for selection among computer integrated manufacturing systems

31 *K.J. Fernandes, V.H. Raja and J. Eyre*
Immersive learning system for manufacturing industries

41 *J. Ciurana, M.L. Garcia-Romeu, R. Castro and M. Alberti*
A system based on machined volumes to reduce the number of route sheets in process planning

51 *Y.-S. Ma and T. Tong*
Associative feature modeling for concurrent engineering integration

73 *Y.Y. Lin-Chen, J. Wang and Q.H. Wu*
A software tool development for pneumatic actuator system simulation and design

89 *A.Y. Yap, O. Ngwenyama and K.-M. Osei-Bryson*
Leveraging knowledge representation, usage, and interpretation to help reengineer the product development life cycle: visual computing and the tacit dimensions of product development

Volume 51, Nr. 2, JUNE 2003

SPECIAL ISSUE: Virtual Enterprise Management

111 **Preface**

Papers

113 *H.T. Goranson*
Architectural support for the advanced virtual enterprise

127 *R.C. Beckett*
Determining the anatomy of business systems for a virtual enterprise

139 *L.M. Camarinha-Matos and H. Afsarmanesh*
Elements of a base VE infrastructure

165 *G.L. Kovács and P. Paganelli*
A planning and management infrastructure for large, complex, distributed projects—beyond ERP and SCM

185 *A. Tharumarajah*
A self-organising view of manufacturing enterprises

197 *J.P.T. Mo and M. Zhou*
Tools and methods for managing intangible assets of virtual enterprise
211 *J. Jarvis, D. Jarvis and D. McFarlane*
Achieving holonic control—an incremental approach
225 *R.W. Brennan and D.H. Norrie*
Metrics for evaluating distributed manufacturing control systems

Volume 51, Nr. 3, AUGUST 2003

Papers

237 *S.H. Choi and A.M.M. Chan*
A layer-based virtual prototyping system for product development
257 *D. Delen and P.C. Benjamin*
Towards a truly integrated enterprise modeling and analysis environment
269 *A. Dvořák, H. Habiballa, V. Novák and V. Pavliska*
The concept of LFLC 2000—its specificity, realization and power of applications
281 *P. Baranyi, D. Tikk, Y. Yam and R.J. Patton*
From differential equations to PDC controller design via numerical transformation
299 *M. Eftekhari, L. Marjanovic and P. Angelov*
Design and performance of a rule-based controller in a naturally ventilated room
327 *R. Crowder, G. Wills and W. Hall*
Evaluation of a hypermedia maintenance support application
